BIBLIOGRAPHY OF AGRICULTURE

Vol. 28 March 1964 No. 3

The Bibliography of Agriculture is an index to the literature of agriculture and the allied sciences received in the National Agricultural Library. Publications from any country are indexed, provided they are in one of the languages of western Europe or in Russian, or have summaries or abstracts in one of those languages.

Literature from the United States and Canada received more than six months after publication (one year for literature received from other countries) is generally not indexed. Exceptions are made for important scientific publications.

Indexing of articles on the processing of agricultural products is limited to those on primary processing.

Unsigned articles and those signed with pseudonyms or initials, editorials, letters to the editor, and columns appearing regularly, are omitted.

FORMAT

The Bibliography is a classified arrangement of references under the following subjects:

Plant Science
Soils and Fertilizers
Forestry
Animal Industry
Entomology
Agricultural Engineering
Agricultural Products
Agricultural Economics and Rural Sociology
Food and Human Nutrition
Miscellaneous

The classified section is followed by the listing of:

New Periodicals and Serials
Translations
USDA Publications
State Agricultural Experiment Station Publications
State Agricultural Extension Service Publications
Food and Agriculture Organization of the UN (FAO) Publications

The last section of each monthly issue, except November, is the author index for that issue.

Foreign language titles of articles in serial publications are given in English only. The language of the text is shown in abbreviated form in parentheses at the end of the title. The following notations are used:
